AIR DATA ACCESSORIES KIT MODEL No. ADA235-723 CASA/IPTN CN-235 AIRCRAFT

- Proprietary Information -

This kit contains all the equipment required to test from source the pitot & static air data system on the CASA/IPTN CN-235 aircraft, as well as the means of pre-testing all adaptors and hoses prior to being fitted to the aircraft.

Pitot & Dual Static Test Adaptor

Part No. PSS88235-3-4-4 (3req'd.)

These units fit the pitot probes 856NC 1 & 2 located on the nose and when installed they will isolate and test each system separately or simultaneously.

Pre-Test Probe

Part No. PT18823 (3 req'd.)

When this unit is inserted into the adaptor and the extension hose is connected from the pneumatic generator, the complete system, tester, hoses and adaptors can be tested before fitting to the aircraft.

Pitot Test Hose Assembly

Part No. 340-7270 (1 req'd.)

This hose is connected to each pitot inlet of the adaptor and is fitted with double acting quick disconnects for use when it is desirable to test only one pitot system. The connection for the pitot outlet of the pneumatic generator hose is included on this assembly.

Hose Assembly

Part No. NAHA-3-84 (1 req'd.)

Static Hose Assembly

Part No. 340-5160 (1 req'd.)

This assembly attaches to the static fittings. The double acting quick disconnects operate in the same manner as that on the pitot test hose assembly. The extension fitting then connects to the static outlet hose of the pneumatic generator.

Hose Assembly

Part No. NAHA-4-84 (1 req'd.)

Seal Kit - Part No. SK235 (3 req'd)

Three sets of spare seals are stowed in the case.

Lubricating Fluid

Part No. LF5050 (1 req'd)

This fluid is used to lubricate the glands of the pitot & dual static and pitot static test adaptors.

Only a very small amount is needed to lubricate the adaptor's interior glands before installing the adaptors onto the aircraft probes.

This process will help to prolong the life of the seals as well as facilitate a smooth installation of the applicable adaptor onto the corresponding aircraft probe.

Using only 1 or 2 drops, apply a thin film coating onto the surface of the applicable Pre-Test Probe(s).

**AIR DATA ACCESSORIES KIT
MODEL No. ADA235-723
CASA/IPTN CN-235 AIRCRAFT**

- Proprietary Information -

Then, while using a slight CW/CCW rotation, insert the Pre-Test Probe into the adaptor when setting-up for the 'Pre-Test' stage of the ADTU before hooking up to the aircraft's probes.

WARNING: Nav-Aids Ltd. ® P/N LF5050, Lubricating Fluid, is the only approved lubricant for this purpose. The use of any other substance may very well have adverse effects that could contribute to a Flight Safety Hazard.

Manual - Part No. 444-235-723

One manual is supplied with each kit.

The equipment is enclosed in a case assembly - Model No. **NANUK950-235-723**.
