

**AIR DATA ACCESSORIES KIT
MODEL No. ADC130-723
NSN: 4920-01-244-3381**

- Proprietary Information -

This kit contains the equipment required to test from source the pitot & static air data system on the aircraft, as well as the means of pre-testing the adaptors prior to being fitted to the aircraft.

Pitot & Dual Static Test Adaptor

Part No. PSS88130-4-6-6 (2 req'd.)

These units fit the pitot probes 856NM located on the nose and when installed they will isolate and test each system separately or simultaneously.

Note: When the adaptor is utilized as blanking unit ensure that blanking caps are tight on the static fittings and that the Pitot hose is attached.

Pre-Test Probe

Part No. PT18813 (2 req'd.)

These units are for use when it is necessary to check the integrity of the pitot & dual static test adaptors. These units are installed into the adaptors thus simulating the pitot probe.

Seal Kit - Part No. SK130 (2 req'd.)

Two sets of spare seals are stowed in the case.

Lubricating Fluid

Part No. LF5050 (1 req'd.)

This fluid is used to lubricate the glands of the pitot and dual static test adaptor. It is recommended that a small amount be placed on the pitot probe before installing adaptor. This will ensure smooth installation.

Manual - Part No. 444-130-723

One manual is supplied with each kit.

The equipment is enclosed in a case assembly.
